

Urinary Catheter Management

About the course

Welcome to the Safe Urinary Catheter Management for Australian Support Workers course. As a support worker in Australia, providing high-quality, safe, and compliant care is your top priority. This comprehensive online course is specifically designed to equip NDIS support workers, nurses, and care providers with the essential knowledge required to safely manage urinary catheters, including in-dwelling, in-out, and suprapubic catheters.

Navigating the NDIS Practice Standards and High Intensity Support Skills Descriptors can be complex. This course simplifies these requirements, ensuring you understand your obligations under the NDIS Code of Conduct, Quality Audits, and Practice Standards. You will explore the specific skills descriptors related to high-intensity daily personal activities, learning exactly who should use them and how they apply to your daily support tasks.

By enrolling in this course, you will gain a deep understanding of urinary catheter support, minimising risks of infection and complications for participants. We will guide you through related resources, including the NDIS Workforce Capability Framework and practice alerts, to ensure your skills remain up-to-date and compliant with Australian national standards.

Whether you are looking to upskill, refresh your knowledge, or ensure your organization meets NDIS provider obligations, this training provides the practical insights and theoretical foundation you need. Join us today to enhance your professional capabilities and deliver exceptional, safe, and person-centered catheter care.
